philosophy

ALL THINGS ARE LIT...

A long journey is made by many small steps.

Landa Illuminotecnica S p A, a manufacturer of outdoor lighting decoration and architecture, founded in 1987, it runs for years with the spirit of continuous improvement. Today we produce light sources for each specific need, without mediation, with particular attention to environmental issues and energy.

Solutions to "energy saving" LED and photovoltaic, Landa devotes an innovative research that has led to important results, creating a synthesis between virtuous energy-saving lighting and rendering, without losing the function of elegance and beauty of light.

The passion drives us and that is the spirit that led us to the results that we present with pride. Aware that our duty is not limited to the delivery of the product we set high standards, including the entire production cycle within the company.

The products are designed and manufactured internally on high standards of quality, by choosing the best materials in compliance with the more stringent regulations, giving the same protection against solid bodies and water sprays. We also use special seals that reset the condensation effect.

Accurate test performed manually on each individual product by qualified technicians, electronic verification of the earth connection and finally a further visual inspection of the product and finish, make a product LANDA.

easy

INTELLIGENT DESIGN:
SIMPLICITY AND EFFICIENCY

The Landa Design Centre works to simplify all installation, assembly and deployment. This research results in a significant cost and time savings.

Look to the product from a perspective of the customer and professional installer, is the premise for a definition of costs trusted that puts away surprises and complications.

This option allows us to be more competitive in the daily challenges that the market imposes "reduce the total cost of ownership."

Minimize maintenance and technical support, avoid qualified installer repeating the work several times, arrange the assembly technique simple and rational.

24

EVER MORE ALONE

Whether it's the ordinary assistance or technical or commercial information rather than for specific needs LANDA is with You. Your problem, your question becomes ours.

For this Landa has defined a standard procedure to answer any question within 24 hours maximum.

The contact with professionals and customers creates a collaboration that does not end in the supply but continues alongside as a reliable and active partner.

WE CARE FOR EVERY DETAILS

Our way of working has always been oriented to quality. All our lighting systems are designed and manufactured entirely within our company and are 100% Made in Italy.

The choice to make in all operations management, design, production, testing and care allows us to deal with self confidence daily challenges.

Each of our product has an "identity card" that allows us to assure you at any time traceability of every stage that the internal process has generated.

For this we can achieve lighting systems that provide excellent results both for beauty and design for sturdiness and durability.

TOGETHER NEXT TO THE CUSTOMER

In every article there is a bit of us, and our promise is that there will always be. The Landa organization is highly qualified and motivated that has as its aim the satisfaction of the customer.

To achieve this goal we put ourselves to the respect of the Customer as a reliable active partner establishing dialogue that allows continuous improvement of service beyond that of the product.

Even for this to consider Landa at your service.

o ur world

FROM 1923 THE EVOLUTION OF QUALITY

LANDA[®]
illuminotecnica

Landa is a member of the La San Marco Group of Bugatti family comprising four young industries operating in different fields, but with the same seriousness and entrepreneurial spirit that from 1923 marks the work of the Bugatti family.

AIGNEP

Aignep, born in 1976, a company that has over thirty years after the start of its activities and continues to run his personal challenge to a market to say the least articulated, that is couplings for compressed air.

BUGATTI[®]
ITALY

The Bugatti family company was founded in 1923 in Lumezzane.

Cutlery, articles for the table and small appliances. The research and design aesthetics with a strong Italian matrix, together with the production philosophy, the roots craft, advanced technology is the strength of Casa Bugatti.

LANDA[®]
illuminotecnica

Landa, present on the market since 1987, with its extensive range of outdoor lighting fixtures not only on the European market but worldwide.

PICCHI[®]
1923
MACCHINE
TRANSFER di **BUGATTI**

Picchi Transfer, producing machine tools since 1958 for high-production, in particular transfer machines, work centers and super-finishing machine with diamond tool; Acquired some time ago from La San Marco holding Bugatti, contributes to technological development of the Group.
